J. GOUCHER, M. D. offers his professional services.

offers his professional services.

The Doctor studied the Old School system with Prof. Valentine Mott. M. D., of New York eity, and graduated in the Medical University of New York, No. 659 Broadway, and also graduated in the Eye and Ear Infirmary of that city. He has also been a Hospital Student of Prof. N. R. Smith, of Baltimere,

The Doctor practiced the Old School system for twenty years. He then studied Homeopathy and graduated in that school, which he practices exclusively. The Doctor has had considerable Hospital experience, and thirty-five years practice in the profession of Medicine.

He is located at Ravenna, Portage county, O., on the Cleaveland & Pittsburgh R. R., eighteen miles north of Alliance; it is at this point where the Great Western crosses the Cleveland road.

The Doctor has his office at his residence, corner of Sycamore and Cedar streets.

ment has lately been made throughout the United States to bring into more

as it appears in the simplest and most liter in litrameter, gram in gram, (see Webster's dic.), are in area; stere in stereoscope. Although, therefore, the was done in Germany, at the time of in all the shop windows. No one could walk twenty steps in the busipainted savages, and the lurid glare of ciety was formed under the joint la new part of the city without seeing itants had to depend upon Hudson for Hudson the men, joined there by the consisted of twelve members. Since charts and models of the metric weights and measures. With these constantly in view, the most ignorant class found ne difficulty in understandsystem of weights and measures .-What a contrast to the anterior confusion! A bey at school can master the metric system in an afternoon. Mouths, it not years, are required to store away the perplexities, incongru-Itles and luconsistencies of the existing weights and measures, and then the memory must often fail in reproducing them. The mystery of compound arithmetic is essential in the calculation which they require. All this is done away by the decimal progression so that the first few rules of arithme-

A circular containing an agreement binding the signers to the use of the been sent to all the cities and towns in the United States containing upwards of 8,000 inhabitants. Every city and town so far canyassed has returned overwhelming majorities. Majerities had previously been secured from New York, Chicago, Brooklyn, Boston, St. Louis, Baltlinore, Pertland Newport, &c., and from over thirty other cities and towns co-operation has been promised. The number of signatures of architects from Boston alone amounts to 104, nearly a totality

> of the profession. THE NEW TABLES. TO SHIP The fellowing simple tables give all that there is in the metric or decimal system of weights and measures :

Money. 10 mills make a cent. 10 cents make a dime. 10 dimes make a dollar.

10 dollars make an eagle. The recent clodes tanger out 10 milli-meters make a centimeter. 10 centi-meters make a decimeter. 10 deci-meters make a meter.

10 meters make a dekameter. 10 deka-meters make a hectometer. 10 hesto-meters make a kilometer. 10 kilo-meters make a myriameter,

Weights. 10 milli-grams make a centigram.

10 centi-grams make a decigram. 10 deci-grams make a gram. 10 grams make a dekagram. 10 deka-grams make a hectogram.

10 hecto-grams make a kilogram. 10 kilo-grams make a myriagram. Capacity. 10 milli-liters mame a centiliter, 10 centi-liters make a deciliter.

10 deci-liters make a liter. 10 liters make a dekaliter. 10 deka-liters make a hectoliter. The square and cubic measures are othing more than the squares and

ubes of the measures of length. (Thus square and a cubic milli-meter are the square and cube of which one side is a millimeter in length.) The are and stere are other names for the THE USE OF TOBACCO.
